GREEN

Your Solar PV system has value beyond its immediate energy savings to you and its reduction of carbon emissions. As you may be aware every year it produces Renewable Energy Credits (referred to SRECS) and the Sustainable Energy Fund (SEF) is providing homeowners and small business owners an opportunity to put these credits to work. As a 501 (c)(3) SEF is now accepting SREC donations as a unique way to further and promote the work that we do on the behalf of electric utility customers in Pennsylvania.

Our mission at the SEF is to meet the energy needs of today without compromising the ability of future generations to meet their needs. We fulfill this mission by assisting people in overcoming obstacles to sustainability primarily through educational programming and financial products.

DONATION

Due to our understanding of the Renewable Energy Credit (REC) market SEF is prepared to credit your donation based on the value of these REC's out over the next ten years. The value of your donation will be based on the size of the system. Your real prospective value will then be in the ability to write off the estimated ten year value of your system. In some cases this may be a considerable tax savings.

DONATION PLUS

Owners of systems producing between 1 and 15 kW have the opportunity to participate in the donation plus program. In an effort to aid small system owners in certain instances SEF will pay \$500 per credit based on the energy generated in the first year of the systems operation. This upfront payment is simply another way you will be recovering the cost of the install. This is a limited offer.

*Everybody's tax situation is different for this reason Sustainable Energy Fund strongly advises all prospective donors to speak with a tax professional before making a charitable donation.

For details contact: Chris Flynn (610-264-4440 Ext 16) at the SEF.
